EDUCATION

Ph.D. in Agricultural and Applied Economics <i>University of Illinois Urbana-Champaign (UIUC)</i> Advisors: Alex Winter-Nelson Catalina Herrera Almanza <i>Dissertation: "Essays on Agricultural Households, Labor Markets, and Welfare"</i>	Expected Fall 2026
Master of Social Science in Economics <i>University of Dhaka, Bangladesh</i>	Dec 2015
Bachelor of Social Science in Economics <i>University of Dhaka, Bangladesh</i>	Dec 2014

RESEARCH INTERESTS

Agricultural Household Economics · Commodity Markets and Price Analysis · Production and Resource Allocation · Rural Labor Markets · Risk and Household Responses

RESEARCH AND PROFESSIONAL EXPERIENCE

Graduate Research Assistant <i>Department of Agricultural and Consumer Economics, University of Illinois Urbana-Champaign</i>	Jan 2021–Present
- Develop theory-guided econometric models to study commodity markets, labor allocation, household economic behavior, and rural development, with applications to agricultural and food systems. - Analyze household, experimental, administrative, and geospatial data for impact evaluation and applied research projects, using causal inference and econometric methods across Bangladesh, India, Tanzania, Kenya, Ethiopia, and Brazil. - Collaborate with economists, public health researchers, and other interdisciplinary partners on policy-relevant research and manuscript development. - Use satellite imagery and remote-sensing methods to measure crop rotation patterns and crop diversity in California agriculture. - Develop reproducible analytical workflows, statistical models, and interactive analytical tools for agricultural and development research. - Prepare manuscripts for peer-reviewed journals, present findings to academic and policy audiences, and contribute to the development of new research questions and collaborative projects.	
Research Consultant <i>Bangladesh Institute of Development Studies (BIDS)</i> Selected Projects:	
Post-Enumeration Check of Bangladesh Economic Census 2024	Jul 2025 – Dec 2025
Post-Enumeration Check of Bangladesh Population and Housing Census 2022	Nov 2023 – Jul 2024
Rural Livelihood Dynamics in the Haor Region of Bangladesh	Sep 2022 – Nov 2022
- Cleaned, validated, and analyzed data from the post-enumeration surveys of the 2022 Population and Housing Census and 2025 Economic Census in Bangladesh using enumeration-area shapefiles. - Contributed to questionnaire design, household and community survey implementation, fieldwork coordination, real-	

time monitoring, and data quality assurance.

- Co-authored the Post Enumeration Survey Report.

Short-term Consultant

Jul 2024–Dec 2024

Development Economics Research Group, World Bank

- Conducted applied econometric analyses using household survey data to study women's mental health, household dynamics, and labor-market outcomes in India.
- Cleaned, harmonized, and analyzed large-scale household survey and experimental datasets using Stata and R, supporting ongoing research and empirical analysis.
- Provided analytical support for randomized controlled trial research, including data preparation, statistical analysis, and assessment of treatment effects and heterogeneous responses.

Research Analyst

Nov 2017–Jan 2021

Development Strategy and Governance Unit, International Food Policy Research Institute (IFPRI)

Project: “Bangladesh Modern Food Storage Facilities Project”

- Developed and applied supply, demand, market-equilibrium, and production models to evaluate agricultural price stabilization, grain storage, market risk, trade, food security, and agricultural policy alternatives.
- Analyzed commodity prices, production, inventories, market integration, and producer incentives using nationally representative survey and administrative datasets.
- Developed structural supply, demand, market equilibrium, and production models to estimate equilibrium prices, producer responses, farm profitability, and the impacts of agricultural policy and commodity price changes.
- Produced policy reports and technical publications used by government agencies and international organizations.
- Coordinated field surveys, managed research workflows, collaborated with multidisciplinary teams, and contributed to grant-supported research projects and technical deliverables.

Research Associate

Mar 2017–Oct 2017

BRAC Institute of Governance and Development (BIGD)

Project: “State of Governance Report 2017”

- Assisted in questionnaire design, household survey implementation, and econometric analysis.
- Performed data cleaning and econometric analysis for the report.
- Contributed to report writing.

PEER-REVIEWED PUBLICATIONS

S. Anukriti, C. Herrera-Almanza, **S. Hossain**, and M. Karra. 2026. “Son Preference, Intergenerational Household Dynamics, and Women's Mental Health in India.” *Journal of Development Economics*, 183: 103867. [\[DOI\]](#) [🔗](#)

WORKING PAPERS

S. Hossain. “Commodity Prices, Shadow Wages, and Household Labor Allocation under Imperfect Markets.” *[Job Market Paper]* [\[Paper\]](#) [🔗](#)

This paper examines how local poultry prices affect household labor allocation and the mechanisms through which these responses arise when rural labor markets are imperfect. Using three rounds of the Bangladesh Integrated Household Survey (2011–2019), I study labor allocation among poultry-producing households. Guided by a non-separable agricultural household model, I recover household-specific shadow wages and household production resources from an estimated household production function and examine how these mechanisms shape labor allocation using an instrumental-variable approach. The results show that local poultry prices primarily affect women's labor allocation. Higher household-specific shadow wages increase labor devoted to poultry production, whereas greater household production resources are associated with broader

adjustments in overall labor supply. These findings show that variation in local poultry prices influences household labor allocation through household-specific opportunity costs rather than observed market wages, highlighting the importance of accounting for labor-market imperfections when evaluating livestock market development and agricultural price policies.

S. Hossain. “Impacts of Illness and Job Loss on Households within Economy-Wide Shocks: Coping through Labor Markets” [*Working Paper; draft available on request*]

Using two-wave household panel data from rural Bangladesh, this paper examines how household-specific illness and job-loss shocks compound the effects of the economy-wide COVID-19 shock and how households adjust through labor markets. I use doubly robust difference-in-differences methods to estimate effects on household welfare, food security, labor supply, and coping responses. The analysis examines adjustments in working hours, occupational allocation, migration, and household labor-force participation, providing evidence on how rural households use labor-market responses to cope with household-specific shocks during a broader economic disruption.

TEACHING EXPERIENCE

Teaching Assistant – University of Illinois Urbana-Champaign

Led discussion sections and problem-solving exercises, evaluated assignments and projects, and provided individual student support.

Courses:

- ACE 300: Intermediate Applied Microeconomics (Fall 2026, forthcoming)
- ACE 231: Food and Agribusiness Management (Spring 2026)
- ACE 251: World Food Economy (Fall 2025)
- ACE 440: Financial Plan for Professionals (Spring 2025)
- ACE 100: Introduction to Applied Microeconomics (Fall 2024)

Instructor – BRAC Institute of Governance and Development (BIGD), BRAC University

Courses:

- Applied Statistical Methods (Summer 2017)

TEACHING INTERESTS

Managerial Agricultural Economics · Agricultural Economics · Applied Microeconomics · Commodity Markets · Quantitative and Data Analysis Methods

PRESENTATIONS

Conference Presentation

“Impacts of Illness and Job Loss on Households within Economy-Wide Shocks: Coping through Labor Markets,” Agricultural and Applied Economics Association Annual Meeting, Denver, CO **Jul 2025**

Departmental Seminars

“Commodity Prices, Shadow Wages, and Household Labor Allocation under Imperfect Labor Markets” at International Policy and Development (IPAD), Department of Agricultural and Consumer Economics, University of Illinois Urbana-Champaign **Oct 2025**

“Impacts of illness and job loss on households within economy-wide shocks: Coping through labor markets” at International Policy and Development (IPAD), Department of Agricultural and Consumer Economics, University of Illinois Urbana-Champaign **Mar 2024**

FELLOWSHIPS AND AWARDS

AAEA Travel Grant - International Section, Agricultural and Applied Economics Association (AAEA) **Summer 2025**

Louise Scholars Graduate Student Fellowship - Agriculture and Consumer Economics, University of Illinois Urbana-Champaign **Fall 2024**

Post Harvest Loss Prevention Fellow - ADM Institute for the Prevention of Postharvest Loss, University of Illinois Urbana-Champaign **Spring 2021 – Summer 2023**

PROFESSIONAL SERVICE

Peer Reviewer: *Studies in Family Planning*; Midwest International Economic Development Conference

TECHNICAL SKILLS

Programming & Statistical Software: R, Stata, Python, SQL, Microsoft Excel, ArcGIS, Git

Econometrics & Causal Inference: Panel Data, Fixed Effects, Instrumental Variables, Difference-in-Differences, Doubly Robust Difference-in-Differences, Matching, and Machine-Learning-Assisted Estimation

Economic Modeling & Agricultural Market Analysis: Production Models, Supply and Demand Analysis, Spatial Equilibrium Models, Commodity Price Analysis, Forecasting, Scenario Analysis, and Policy Simulation

Data & Visualization: Household, Market, Administrative, Panel, Experimental, and Geospatial Data; R Shiny, Tableau, ggplot2

Languages: English (Fluent), Bangla (Native), Hindi (Intermediate)
